

## An Interesting **Experiment**

Use Crisco over and over for frying all manner of foods. Merely strain the food particles from the hot Crisco after each frying. Crisco does not transmit flavors or odors.

The test of frying fish, potatoes, etc., clearly illustrates Crisco's great economy. The use of Crisco does away with the bother of keeping different fats for the preparation of different foods.

You will notice that your fried foods lack that "lardy" taste; that the true flavor which hitherto has been hidden now delights your sense of taste; that Crisco foods are more digestible.

Crisco is a food fat, not merely a frying medium.

Crisco in place of butter gives richness at less expense, as it costs about one-half as much as butter. It actually is a richer shortening, 100 per cent pure fat; butter only is about four-fifths shortening. Salt is put in butter to keep it sweet; Crisco remains pure and fresh indefinitely without salt.

"MADE IN U. S. A." Now Is the Time to Hustle for the Home

In the November American Magazine appears a highly interesting and practically suggestive article entitled "How the War Has Opened a Business Oppor-tunity to America." The author says that in 1913 we imported from Europe \$120,000,000 worth of goods that we ought really to manufacture ourselves. With these importations out off, a great opportunity is offered to American manufacturers. In the following passage the importance of this fresh opportunity mother's millinery.
